

Selecting a phenomenon

CHECK list

- Is it current and timely? Are students able to observe the phenomenon (& its consequences) in action?
- Does it offer the appropriate breadth and depth for the intended learning outcomes?
- Does it provide a variety of possibilities for the students to explore in the timeframe given?
- Are there no agreed solutions or resolutions attached?
- How can you translate this into a "What if" format?
- Is it clear how it intersects with society and academia?
- Does it carry meaning and relevance for the disciplines and subject areas involved?
- Does it avoid having one exclusive discipline focus?
