The UK Quality Code comprises 12 Sector-Agreed Principles which offer a framework on which to design, develop, implement and enhance the quality of provision regardless of regulatory approach, precise educational setting or level or mode of study. This document shows these 12 Principles. See the Quality Code 2024 for full information including the Key Practices that support these Principles.

**Strategic approach**

**Principle 1 - Taking a strategic approach to managing quality and standards**
Providers demonstrate they have a strategic approach to securing academic standards and assuring and enhancing quality that is embedded across the organisation.

**Principle 2 - Engaging students as partners**
Providers take deliberate steps to engage students as active partners in assuring and enhancing the quality of the student learning experience. Engagement happens individually and collectively to influence all levels of study and decision-making. Enhancements identified through student engagement activities are implemented, where appropriate, and communicated to staff and students.

**Principle 3 - Resourcing delivery of a high-quality learning experience**
Providers plan, secure and maintain resources relating to learning, technology, facilities and staffing to enable the delivery and enhancement of an accessible, innovative and high-quality learning experience for students that aligns with the provider’s strategy and the composition of the student body.

**Principle 4 - Using data to inform and evaluate quality**
Providers collect, analyse and utilise qualitative and quantitative data at provider, departmental, programme and module levels. These analyses inform decision-making with the aim of enhancing practices and processes relating to teaching, learning and the wider student experience.

**Principle 5 - Monitoring, evaluating and enhancing provision**
Providers regularly monitor and review their provision to secure academic standards and enhance quality. Deliberate steps are taken to engage and involve students, staff and external expertise in monitoring and evaluation activity. The outcomes and impact of these activities are considered at provider level to drive reflection and enhancement across the provider.

**Principle 6 - Engaging in external review and accreditation**
Providers engage with external reviews to give assurance about the effectiveness of their approach to managing quality and standards. External reviews offer insights about the comparability of providers’ approaches and generate outcomes that providers can use to enhance their policies and practices. Reviews may be commissioned by providers, form part of a national quality framework or linked to professional recognition and actively include staff, students and peers. They can be undertaken by representative organisations, agencies or professional, statutory and regulatory bodies (PSRBs) with recognised sector expertise according to the provision being reviewed.

**Evaluating quality and standards**

**Principle 7 - Designing, developing, approving and modifying programmes**
Providers design, develop, approve and modify programmes and modules to ensure the quality of provision and the academic standards of awards are consistent with the relevant Qualifications Framework. Providers ensure their provision and level of qualifications are comparable to those offered across the UK and, where applicable, The Framework of Qualifications for The European Higher Education Area.

**Principle 8 - Operating partnerships with other organisations**
Providers and their partners agree proportionate arrangements for effective governance to secure the mutual and specific responsibilities in relation to delivering, monitoring, evaluating, assuring and enhancing the learning experience.

**Principle 9 - Recruiting, selecting and admitting students**
Providers operate recruitment, selection and admissions processes that are transparent, fair and inclusive. Providers maintain and publish accurate, relevant and accessible information about their provision, enabling students to make informed choices about their studies and future aspirations.

**Principle 10 - Supporting students to achieve their potential**
Providers facilitate a framework of support for students that enables them to have a high-quality learning experience and to progress through their studies. All students are supported to develop and demonstrate academic and professional skills and competencies. The support structure scaffolds the academic, personal and professional learning journey, enabling students to recognise and articulate their progress and achievements.

**Principle 11 - Teaching, learning and assessment**
Providers facilitate a collaborative and inclusive approach that enables students to have a high-quality learning experience and to progress through their studies. All students are supported to develop and demonstrate academic and professional skills and competencies. Assessment employs a variety of methods, embodying the values of academic integrity, producing outcomes that are comparable across the UK and recognised globally.

**Principle 12 - Operating concerns, complaints and appeals processes**
Providers operate processes for complaints and appeals that are robust, fair, transparent and accessible, and clearly articulated to staff and students. Policies and processes for concerns, complaints and appeals are regularly reviewed and the outcomes are used to support the enhancement of provision and the student experience.
