About the Quality Assurance Agency for Higher Education (QAA)

The Quality Assurance Agency for Higher Education (QAA) is an independent charity working to benefit students and higher education, and one of the world's experts in quality assurance. We are trusted by higher education providers and regulatory bodies to maintain and enhance quality and standards. We work with governments, agencies and institutions globally to benefit UK higher education and its international reputation.

We provide services and advice to our member institutions in England, including support with quality enhancement activities. In Scotland, Wales and Northern Ireland, our quality enhancement and membership work is provided in concert with, and informed by, our quality assurance activities. We work closely with all higher education providers and the respective funders and regulators, in line with the policy and regulatory approach of each nation.

Our UK-wide responsibilities include being the regulator of the Access to HE Diploma, which transforms lives by offering students from non-traditional backgrounds access to higher education.

QAA is recognised for its leading role in international developments in the quality assurance of higher education. QAA works not just to maintain but to enhance the quality and integrity of the higher education sector internationally through its international work, in full alignment with European Standards and Guidelines.

International recognition of QAA

We are a full member of the European Association for Quality Assurance in Higher Education (ENQA) - the umbrella organisation for quality assurance agencies in the European Higher Education Area. Full membership of ENQA shows that an agency complies with the Standards and Guidelines for Quality Assurance in the European Higher Education Area.

Compliance with these standards is checked every five years through an independent review. Our last ENQA review took place in February 2018. The review report is published on the ENQA website: External review of QAA (2018) - ENQA.
About International Quality Review (IQR)

International Quality Review (IQR) offers institutions outside the UK the opportunity to have an independent peer review which may lead to accreditation by the UK’s Quality Assurance Agency for Higher Education (QAA). The review includes the systematic monitoring and evaluation of learning and teaching, and the processes that support them, to make sure that the standards of academic awards meet the required level and the quality of the student learning experience is being safeguarded and continually improved.

IQR assesses the applicant institutions against the European Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG Part 1: Internal Quality Assurance). QAA will also take into account the local context; national and regional regulatory requirements; and standards including the ESG. For an additional cost, QAA can tailor the review to include additional aspects that meet your specific requirements.

IQR benefits higher education institutions by enabling you to analyse and improve the quality assurance systems that safeguard your programmes, which supports development of your curriculum and helps student achievement. You do this through:

1. Analysing and evaluating your own processes
2. Taking part in an external review by an experienced team of QAA’s peer reviewers
3. Follow-up action planning
4. Mid-cycle review

A successful International Quality Review means that you are officially accredited by QAA. You will be eligible to display the QAA Institutional Accreditation Badge which will demonstrate that your quality assurance processes are not only effective, but also comparable with international best practice. The QAA Institutional Accreditation Badge can be displayed on your website and marketing material for the period of the accreditation.
An overview of the process

International Quality Review takes place in five stages:

Stage 1: Application
Stage 2: Scoping
Stage 3: Review
Stage 4: Accreditation
Stage 5: Mid-cycle review

Application

An international higher education institution seeking to undertake an IQR, completes an application form and provides evidence demonstrating that it meets the eligibility criteria. This is scrutinised by a Screening Panel to determine whether the institution could proceed to the scoping stage.

Scoping

The institution submits a specified range of documentation relating to its internal quality assurance processes, academic courses, student achievement, etc. QAA carries out a desk-based analysis followed by a site visit to the institution. QAA determines the suitability of the institution to proceed to a full review and the institution has the opportunity to learn more about IQR and the requirements for a review. Institutions could choose not to progress to the full review stage.

Review

The review is an opportunity for the institution to demonstrate how it meets each of the 10 Standards set out in Part 1 of the ESG through a self-evaluation document (SED), supported by relevant evidence. The review team of three - comprising one UK peer reviewer, one international peer reviewer and one student reviewer - initially analyses the SED and evidence, and prepares an analysis which will be considered prior to the review visit. The review team then visits the institution to meet staff, students and other stakeholders. The review team considers the evidence to confirm whether or not the institution meets the 10 ESG standards. The review team draft a report setting out their findings on whether or not each of the standards is met along with recommendations and aspects of good practice.

Accreditation

The review panel presents the review report and the recommendation regarding accreditation to the QAA Accreditation Panel. The Accreditation Panel considers the report and recommendation, and determines whether the institution should be awarded Institutional Accreditation. Where accreditation is awarded, QAA shares the QAA Institutional Accreditation Badge with the institution for use. The accreditation period is five years and is subject to a satisfactory mid-cycle review which must be completed for the full five years' accreditation to be granted. QAA publishes the review report on the QAA website together
with a link to the action plan which is published on the institution’s website. The action plan is developed by the institution in response to the conclusions of the review report.

**Mid-cycle review**

This takes place two to three years after a successful review. It is usually a desk-based study and the institution is asked to provide evidence that any recommendations and other findings from the IQR review are being addressed. The institution is also asked to outline any changes that might impact on the extent to which the standards are being met.

Towards the end of the five-year accreditation period, the institution is invited to seek reaccreditation; or the institution approaches QAA with a request to do so. Where the institution chooses to seek a further five-year accreditation, the process for the renewal of IQR commences at Stage 3: Review.
Stage 1: Application

Eligibility criteria

To be eligible for the International Quality Review (IQR), your institution will need to demonstrate to QAA, through the evidence provided, that the following criteria are met:

1. The IQR process will be conducted in English and the institution will take full responsibility for any translations from and into English which are deemed necessary for the process.

2. The institution is registered, or otherwise appropriately recognised, as a higher education institution by the national quality assurance authority or other relevant agency or ministry of the country or countries in which it is located.

3. The national quality assurance authority or other relevant agency or ministry is aware of the institution's intention to request an IQR from QAA.

4. The institution has been operational for a minimum of three years at the time of application.

5. The institution has recruited a minimum of three cohorts of students, at least one of which has graduated.

6. The institution is financially viable and sustainable.

7. The institution has the legal right to use the infrastructure, main facilities and resources of the premises in which it delivers higher education.

8. A significant amount of the provision the institution offers can be regarded as higher education, both in terms of student headcount and percentage of provision.

Eligibility will also depend on the outcome of a risk assessment by QAA. For example, QAA will assess the safety and stability of the environment in which the institution is operating. QAA reserves the right to revise this assessment in the face of significant events.

IQR reviews an institution's quality assurance and enhancement processes as a whole; it does not review or accredit individual courses or subjects. A successful IQR review may lead to accreditation of the institution's quality assurance and enhancement processes.

IQR does not, nor does it seek to, replace national requirements and does not authorise an institution to offer programmes outside their national regulatory systems or within the UK national higher education context. IQR does not confer degree awarding powers and it does not itself confer any legal or funding benefits on a successful institution.

Further details about the supporting documentation required at application stage can be found in Appendix 1.
The application process

The key stages in application are:

1. Institution sends QAA an application form and relevant evidence (*Appendix 1*)
2. QAA acknowledges receipt
3. QAA screens application
4. QAA writes to institution to explain the decision and how it has been made

- Eligibility criteria not met
  - Institution considers next step in its development

- Eligibility criteria met
  - Institution can choose to progress to scoping stage

The decision of QAA as to whether an institution meets the eligibility criteria is final. If your application is unsuccessful but after a period of further development your institution feels that it would meet the criteria, we would welcome a new application.

Ask QAA about our development and capacity building programmes to support institutions in preparing for IQR.
Stage 2: Scoping

The scoping stage is the opportunity for your institution to learn more about IQR and requirements for a review. It also enables QAA to determine whether your institution is suitable to proceed to Stage 3: Review. The scoping stage should take place within six months following the completion of Stage 1: Application.

Scoping stage criteria

To prove your institution's readiness to progress to a full institutional review, you will need to demonstrate to QAA, through the evidence provided, that the following criteria are met:

1  Governance

1.1 The institution should be able to demonstrate oversight of its strategic development and financial affairs by key stakeholders.

1.2 There should be a clear management structure for discharging executive functions.

1.3 The committee structure should encourage involvement in the deliberation of key academic issues, including quality and standards. There should be clear reporting lines to senior decision-making bodies.

2  Externality and reference points

2.1 The institution should be able to indicate how it makes use of external input and reference points in the management of its academic programmes.

2.2 Academic programmes should be mapped against recognised qualifications frameworks.

2.3 The institution should show engagement with academic and professional networks and organisations.

3  Internal monitoring and review

3.1 The institution should be able to detail how it regularly monitors its academic programmes - including feedback from staff and students.

3.2 There should be established systems for annual and periodic monitoring and review, including action planning.

4  External accreditation

4.1 If appropriate, the institution should provide information about recent accreditation activities by external agencies and/or professional bodies.

4.2 Students and other stakeholders should be aware of the accreditation status of relevant programmes.

5  Staffing

5.1 The institution should employ appropriately qualified staff to deliver its academic programmes.

5.2 Staff should be up-to-date and knowledgeable in their academic discipline and should engage in scholarly activity.
5.3 The institution should have sufficient professional and administrative staff to support the academic programmes.

6 Any other information

6.1 Details of relationships with validating higher education institutions and other organisations - including UK partnerships.

6.2 Engagement with the European Standards and Guidelines and the Bologna expectations.

6.3 Overview of facilities to support higher education provision.

Further details about the supporting documentation required at scoping stage can be found in Appendix 2.

The scoping process

The key stages in the scoping are:

<table>
<thead>
<tr>
<th>Before scoping visit</th>
<th>During scoping visit</th>
<th>After scoping visit</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Virtual preparatory meeting</td>
<td>• Meetings with range of staff, students, employers and alumni, as relevant</td>
<td>• Draft report to institution</td>
</tr>
<tr>
<td>• Liaison between QAA Officer and your institution to confirm the review visit agenda and who the QAA team will meet</td>
<td>• Observation of facilities and learning resources</td>
<td>• Factual amendments</td>
</tr>
<tr>
<td>• Prepare and submit your documents</td>
<td></td>
<td>• Final report and outcome to institution</td>
</tr>
<tr>
<td>• Desk-based analysis</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The process takes place over approximately two months. An indicative timeline for the Scoping stage can be found in Appendix 3.

Before the scoping visit

The scoping team

QAA appoints a scoping team of two, including one QAA Officer and one assessor to carry out the scoping.

The QAA Officer will coordinate the scoping process and act as the primary point of contact with your institution. Your institution will be told who the QAA Officer is and how to contact them. Your institution is welcome to get in contact to ask questions. The QAA Officer is responsible for the logistics of the scoping stage including liaising with your institution, confirming the programmes for the scoping visit, keeping a record of all discussions, preparing and editing the report, as well as acting as an assessor. Further details about the role of the QAA Officer can be found in Appendix 4.
QAA will indicate the membership of the scoping team to your institution. Your institution will be informed which institutions or organisations the members of the scoping team work for and whether they have declared any other interests (such as membership of a governing body of another provider). QAA will ask your institution to indicate any actual or potential conflicts of interest that the scoping team might have with your institution and may adjust team membership in light of that information.

The facilitator

Your institution must nominate a facilitator to work with the QAA Officer. The facilitator helps to organise and ensure the smooth running of the scoping stage and improve the flow of information between the QAA scoping team and your institution. The development of an effective working relationship between QAA and your institution through the facilitator, should help to avoid misunderstandings (for example, your institution misunderstanding what QAA requires, or QAA misunderstanding the nature and scope of your institution’s provision). Further details about the role of the facilitator can be found in Appendix 4.

Supporting documentation

As part of the preparation for the scoping visit, your institution will be asked to submit a brief evidence-based report to QAA summarising:

- governance, management and committee structures
- the use of external expertise and reference points in designing and approving programmes
- internal monitoring and review systems
- any external accreditation that the institution has, including at programme level
- staffing at the institution
- any general queries arising from the application.

A report template, for your use, will be shared with you prior to your submission. The summary report that you write is likely to be the first piece of evidence the scoping team will encounter in the scoping process. It will continue to be used throughout the process, both as a source of information and as a way of navigating the supporting documentation.

The report must be accompanied by supporting documentation as evidence. Your institution may also be asked for additional information following the QAA team’s desk-based analysis of your submission. Further details about technical requirements for the institution submission and supporting documentation can be found in Appendix 5.

QAA may also compile information about your institution from publicly-available sources. This will vary depending on your institution and may include the most recent reports relating to your institution from other national and international agencies and organisations, and other organisations with which your institution works in partnerships, and information that is freely available on your institution’s website.

Virtual preparatory meeting

Prior to the scoping visit, the QAA Officer will arrange a virtual preparatory meeting with your institution. The QAA Officer will deliver a briefing on the scoping process which is followed by the opportunity for you to ask questions. The QAA Officer will discuss the agenda for the scoping visit and will advise your institution who it would like to meet and when the meetings should take place. The QAA Officer will also explain and agree logistics such as arrangements for the uploading of evidence, the meeting schedule, the platform to be used, and the evidence of the facilities that will be necessary for this stage.
During the scoping visit

The scoping visit will normally last two days and will reflect the scale and complexity of the provision under review. A sample scoping visit schedule is provided at Appendix 6. Guiding principles to determine whether a scoping or particular elements of a scoping should be undertaken onsite are provided at Appendix 7.

The scoping team will hold meetings with a range of your staff, students and other stakeholders according to a schedule agreed with the facilitator in advance. The facilitator will be responsible for arranging the necessary meetings, ensuring they start on time, and that the agreed participants attend. The scoping team will adhere strictly to the schedule, starting and finishing meetings on time. The schedule will also allow time for the scoping team to have private team meetings and meals where they can discuss and explore the review themes; the times of these private meetings must also be strictly observed. A protocol for the conduct of meetings is provided in Appendix 8. You should make sure that everyone attending a meeting with the scoping team are made aware of the protocol.

After the scoping visit

Following the desk-based analysis and the visit, QAA will send a scoping report and a letter to your institution stating whether your institution is able to progress to Stage 3: Review. The letter will explain how the scoping team reached their decision.

Your institution should not take the outcome of the scoping stage as a guarantee that it will achieve a successful accreditation outcome following the review.

If your institution is not able to progress, QAA will identify points for consideration about what your institution would need to do to be eligible for the review stage in future. The letter will also explain how your institution can re-engage with the process towards review and accreditation.

The scoping report will not be published on the QAA website. QAA's decision as to whether your institution is suitable to progress to the review stage is final.
Stage 3: Review

The review stage is the opportunity for your institution to demonstrate how it meets each of the 10 Standards set out in Part 1 of the ESG.

Following a successful scoping, dates for the review are established; the review should take place within 12 months of Stage 2: Scoping. QAA will provide your institution with the timeline for its review, including due dates for carrying out its responsibilities. QAA will also provide you with full briefing material to support the preparation for the review.

The review team conducts the review through analysis of the evidence submitted and a review visit to the institution, as detailed in later sections of this handbook.

IQR Accreditation Standards

IQR uses the standards for internal quality assurance set out in Part 1 of the ESG as its review criteria. During the review, the QAA team considers how and whether your institution meets each of the standards. In relation to each standard, the review team analyses evidence, including policies, procedures and systems and decides whether these enable your institution confidently to demonstrate that it meets the relevant standard in each case. The review team also considers whether these policies, procedures and systems are clear, transparent, appropriate, fair and relevant, and whether they are systematically applied, consistently operated and effective. The review team will consider, and where appropriate make allowance for, the context in which your institution operates.

The 10 European standards for internal quality assurance

1.1 Policy for quality assurance
1.2 Design and approval of programmes
1.3 Student-centred learning, teaching and assessment
1.4 Student admission, progression, recognition and certification
1.5 Teaching staff
1.6 Learning resources and student support
1.7 Information management
1.8 Public information
1.9 Ongoing monitoring and periodic review of programmes
1.10 Cyclical external quality assurance

For more information and examples of practice to meet the ESG Standards, see Appendix 9.
The review process

The key stages in the review are:

**Before review visit**

- Review team appointed
- Virtual preparatory meeting
- Institution submission
- Desk-based analysis

**During review visit**

- Meetings with range of staff, students, employers and alumni, as relevant
- Observation of facilities and learning resources

**After review visit**

- Draft report to QAA moderation
- Draft report to Accreditation Panel

The process takes place over approximately five months. An indicative timeline for the review stage can be found in Appendix 3.

**Before the review visit**

**The review team**

QAA normally appoints a team of three reviewers to conduct the review and a QAA Officer to manage it. Each QAA review team consists of one UK peer reviewer, one international peer reviewer (from outside the UK), and a student reviewer. QAA peer reviewers have current or recent senior-level expertise and experience in the management and quality assurance of higher education provision in the UK and internationally. Student reviewers are recruited from students or sabbatical officers who have experience of contributing, as a representative of students’ interests, to the management of academic standards and quality. QAA believes that students play a critical role in the quality assurance of higher education. Because of this, student reviewers are therefore full and equal members of review teams. They provide a valuable insight from the perspective of being, or having recently been, recipients of higher education.

Review team members are selected based on their experience in higher education and are expected to draw on this in their evaluations and conclusions about the management of quality and academic standards. All reviewers are fully trained by QAA.

Depending on the scale and complexity of the provision under review, QAA may appoint a larger team; this will be discussed with you before you commit to undertake Stage 3: Review.

QAA will provide names of the proposed QAA review team for confirmation by you in advance of the review. You will be informed which institutions or organisations the members of the review team work for or, in the case of student reviewers, the institution(s) at which they have studied, and whether they have declared any other interests (such as membership of a governing body of another institution). QAA will ask you to indicate any actual or potential conflicts of interest that reviewers might have with your institution and may adjust team membership in light of that information.
QAA Officer

QAA will appoint a QAA Officer to coordinate the review process, support the review team, and act as the primary point of contact with your institution. QAA will tell you who the QAA Officer is and you will be welcome to get in contact to ask questions. The QAA Officer can provide advice about the review process but cannot act as a consultant for your preparation for the review, nor comment on whether the processes in place for quality assurance are appropriate or fit-for-purpose; that is the job of the review team.

The QAA Officer is responsible for the logistics of the review including liaising with the institution, confirming the review visit schedule, keeping a record of all discussions, and editing the review report.

The QAA Officer also advises and guides the review team in its deliberations to ensure that decisions and the overall conclusion are securely based on evidence available and that each review is conducted in a consistent manner.

The facilitator

Your institution must nominate a facilitator to work with the QAA Officer. The facilitator helps to organise and ensure the smooth running of the review process and improve the flow of information between the review team and your institution. The development of an effective working relationship between QAA and your institution through the facilitator should help to avoid misunderstandings (for example, your institution misunderstanding what QAA requires, or QAA misunderstanding the nature and scope of your institution). Further details about the role of the facilitator are in Appendix 4.

Lead student representative (LSR)

Students from your institution may also contribute to the review process by, for example, providing a written document describing what it is like to be a student at the institution. This might take the form of a written document or could be done by analysing the outcomes of a questionnaire in relation to their learning experience and their experience of quality assurance at the institution. Students are expected to participate in meetings during the review visit and assist your institution in drawing up and implementing the action plan following the review.

There is the option for a student to undertake the role of lead student representative (LSR). This voluntary role is designed to allow students to play a central part in the organisation of the review. The LSR helps ensure smooth communication between the student body, the institution and QAA, and will normally oversee the production of a student submission. If possible, QAA would like to work with the LSR to select the students that the review team will meet.

If you decide to appoint an LSR, it is recommended that the volunteer(s) be appointed by the students themselves, with support from a student representative body or equivalent. The LSR must be a member of the student representative body. The role of LSR may be operated on a shared-role arrangement providing it is clear who is the main LSR point of contact.

You are expected to provide as much operational and logistical support to the LSR as is feasible and, in particular, to ensure that any relevant information or data is shared with the LSR to ensure that the student submission is well-informed, representative of students’ views, and evidence-based. Students would be expected to share their evidence and information with you on a similar basis.
Further information on the role of the LSR and student involvement in the review can be found in Appendix 4 and Appendix 10.

**Documentation for the review**

The evidence-base for IQR is a combination of information collected and submitted by your institution, including the self-evaluation document (Appendix 11), together with its supporting evidence and information provided by students - for instance, a student submission (Appendix 10). Further details about technical requirements for the submission can be found in Appendix 5.

QAA may also compile information about your institution from publicly-available sources. This will vary depending on your institution and may include the most recent reports relating to your institution from other national and international agencies and organisations, and other organisations with which your institution works in partnership, and information that is freely available on your institution's website.

**Self-evaluation document (SED):** Your institution is required to prepare a self-evaluation document (SED) supported by documentary evidence for the review. Guidance on how to structure the SED is provided in Appendix 11. QAA will provide further guidance on compiling the SED when briefing about the review process at the virtual preparatory meeting with your institution. The SED is intended to be reflective, evaluative and focused on the areas of review; the evidence should be carefully chosen to support these. High-quality, relevant evidence enables the review team to verify your institution's approaches and gather relevant and appropriate evidence of its own quickly and effectively.

**Supporting documentation:** The SED must be accompanied by supporting documentation as evidence. Your institution may also be asked for additional information by the review team following the QAA team's desk-based analysis of your submission. The review team has three main opportunities to ask for additional evidence from your institution: before the first review team meeting; between the first review team meeting and the review visit; and at the review visit itself. The review team will only ask you for additional information that assists them in forming robust opinions on how your institution meets the IQR standards. Requests will be specific and proportionate.

**Virtual preparatory meeting**

Prior to your submission, the QAA Officer will arrange a virtual preparatory meeting with your institution. The QAA Officer will deliver a briefing on the review process which is followed by the opportunity for you to discuss the key features of the review method and ask questions. The QAA Officer will discuss the review timeline including that of the submission and visit dates and further details of how to prepare institution and student submissions.

**Pre-visit analysis**

The pre-visit analysis begins with the reviewers undertaking a desk-based analysis of the SED and the supporting evidence. Should the review team identify any gaps in the information, or require further evidence about specific issues, a request for further information is made through the QAA Officer.

The review team holds a first review team meeting. Its purpose is to allow the team to:

- discuss its analysis of the documentary evidence
- decide on issues for further exploration at the review visit
- decide whether it requires any further documentary evidence
- confirm the requirements for the review visit.
The QAA Officer then confirms the arrangements for the review with you, including who the review team wishes to meet.

**During the review visit**

The review visit will normally last between three and five days and will reflect the scale and complexity of the provision under review. A sample review schedule is provided at Appendix 6. Guiding principles to determine whether a review or particular elements of a review should be undertaken onsite are provided at Appendix 7.

The review team will hold meetings according to a schedule agreed in advance with the facilitator. The facilitator will be responsible for arranging the necessary meetings, ensuring they start on time, and that the agreed participants attend. The review team will adhere strictly to the schedule, starting and finishing meetings on time. The schedule will also allow time for the review team to have private team meetings where they can discuss and explore the review themes; the times of these private meetings must also be strictly observed. A protocol for review meetings is provided at Appendix 8. You should make sure that everyone attending a meeting with the review team are made aware of the protocol.

At the beginning of the review visit, the review team will hold a meeting with the head of your institution, which should highlight your institution's overall strategy for higher education. Thereafter, the activity carried out at the review may include contact with academic and support staff (including staff from partner organisations where applicable), current students and recent graduates, and employers with which your institution has partnerships. The review team will ensure that its schedule includes meetings with students. This enables them to gain first-hand information on their experience as learners and on their engagement with your institution's quality assurance and enhancement processes.

Where your institution has significant formal arrangements for working with partners who provide learning opportunities or student support, the review team may ask to meet staff and students from one or more of those partners by video conference or teleconference. These meetings will take place within the period of the review unless there is good reason why this cannot happen (for instance, because the review coincides with another organisation's vacation period).

The review visit will include a final meeting between the review team and the head of your institution, the facilitator and the LSR (if there is one). This will be an opportunity for the review team to summarise the major lines of enquiry and issues that it has pursued (and may still be pursuing). Your institution also has a final opportunity to offer clarification and/or present evidence that will help the review team secure its findings. It will not be a feedback meeting about the findings of the review.

The facilitator and LSR (if there is one) will not be present with the review team for its private meetings. The review team is not expected to have regular contact with them, other than at the beginning and/or end of the day, or when they are invited to clarify evidence or provide information. However, the facilitator and LSR (if there is one) can suggest additional short meetings if they want to alert the review team to information which they consider the team might find useful.

On the final day of the review visit, the review team considers its findings in private in order to:

- agree the decisions for each of the ESG standards
- agree any features of good practice that it wishes to highlight
- agree any recommendations for action by your institution
- decide on its overall conclusion for the review and any conditions
• agree on its recommendation to the Accreditation Panel regarding the outcome of the review and any conditions.

After the review visit

The review team considers your institution’s processes against the ESG standards and considers how these are applied within the context of your institution. The review team also considers other relevant reference points - for example, those set out by any other body that validates your institution's award/qualification and with whom your institution collaborates. The review team then decides if your institution meets each of the 10 ESG standards and, on that basis, comes to its overall conclusion. Further details of how the findings are determined by the review team can be found in Appendix 12.

Following the review visit, the review team will finalise its key findings from the review and work with the QAA Officer to produce the review report.

Once the team has drafted its report, it will be reviewed by an independent panel of QAA Officers who were not involved in the review of the institution. The purpose of this QAA internal moderation process is to check whether the review has been conducted in line with the published method and whether the review findings are clearly articulated, evidence-based and consistent. The draft report will then be presented to the QAA Accreditation Panel to consider whether your institution should be awarded QAA International Institutional Accreditation.
Stage 4: Accreditation

At the Accreditation Stage, the review team will present the draft review report and its recommendation regarding institutional accreditation to the QAA Accreditation Panel (Appendix 13). The Accreditation Panel will consider the report and reach a decision as to whether or not your institution can be formally accredited by QAA. The Accreditation Panel meets every three months and meetings are scheduled at least 12 months in advance. All completed IQR reports are presented to the next scheduled Accreditation Panel meeting following completion of the QAA internal moderation process.

Approximately two weeks after the Accreditation Panel meeting, your institution will receive the draft report. The report may contain recommendations and features of good practice, followed by the analysis and evidence that supports the findings. This analysis will be separated into 10 sections representing the 10 ESG Standards. The findings will also be summarised in a short executive summary at the beginning of the report.

You have the opportunity to respond within two weeks of receipt of the draft report, informing QAA of any factual errors or any misinterpretations leading from those inaccuracies. These can only relate to evidence made available to the review team in the period before or during the review visit; the review team will not consider amending the report to reflect evidence, changes or developments made after the review visit ended. The draft report will also be shared with the LSR where relevant, who will be invited to provide comments by the same deadline. If your institution provides higher education leading to qualifications of separate awarding bodies, then any other awarding bodies discussed in the report will also receive a draft copy and be invited to comment on any factual errors or errors of interpretation.

The review team will consider your response and make any changes it deems necessary, incorporating those changes in a revised report.

The overall judgement

The three possibilities for the overall judgement are:

- your institution meets all the standards for International Quality Review
- your institution meets all the standards for International Quality Review subject to meeting specific conditions
- your institution does not meet the standards for International Quality Review.

These possibilities and the next steps are explained below.

Your institution meets all the standards for International Quality Review

Where the draft report concludes that your institution meets all 10 of the IQR standards, the report will be finalised (following receipt of your feedback regarding factual accuracy). The finalised report will be sent to you together with the outcome letter.

Where accreditation is awarded, QAA will share the QAA Institutional Accreditation Badge with you, together with details on how and where it can, and cannot, be used. The accreditation period is five years and is subject to a satisfactory mid-cycle review which must be completed for the full five years’ accreditation to be granted.
Your IQR report will be published on QAA’s website. The report sets out the review team’s confirmed findings (overall judgements, recommendations and good practice) and analysis as confirmed by the Accreditation Panel. Your institution can make the report available via its media outlets.

Where successful with International Quality Review, your institution will be able to make the following statement:

‘[Your institution] has received a successful International Quality Review from the UK’s Quality Assurance Agency for Higher Education (QAA) undertaken in [Month] [Year], in acknowledgement that at the time of review [your institution] met all the standards set out by QAA’s International Quality Review.

[Your institution] has been awarded QAA International Institutional Accreditation until [Month] [Year].’

Your institution is expected to provide an action plan within four weeks after receiving the draft report. The action plan should be signed off by the head of your institution, responding to the recommendations, if any, and giving any plans to capitalise on the identified good practice. The action plan must be published on your institution’s website; the link to your action plan will be published on the QAA website alongside the IQR report. Further details of how to produce an action plan are in Appendix 14.

If your institution undergoes a successful review but, without good reason, does not provide an action plan within the required timescale, QAA will reconsider the overall outcome of the review and the right to use the QAA logo and the award of accreditation may be withdrawn.

After accreditation, any significant changes to your institution must be notified to QAA with six months’ notice of the proposed changes. The effect of requested changes on accreditation and the actions required will be considered by QAA and communicated to your institution.

**Your institution meets all the standards for International Quality Review subject to meeting specific conditions**

Where only one (or at most) two of the IQR standards are not fully met, the Accreditation Panel may decide to set specific conditions that enable a successful IQR outcome to be achieved. They will only be set where they relate to a very small number of weaknesses that, while potentially significant, only impact on whether the one (or at most two) IQR standards are met. The Accreditation Panel will only do this if they consider that the weaknesses can be rectified in a short space of time and in a way that can be sufficiently analysed through a brief desk-based exercise following specific actions undertaken by your institution and a subsequent submission to QAA of further evidence.

Where the draft report concludes that your institution meets all the IQR standards subject to meeting specific conditions, the review process will be extended by a maximum of 12 months to allow your institution to meet those conditions and the review team to confirm that it has done so successfully. QAA will work with you to set out a time frame with follow-up actions.

Your institution is expected to provide an action plan within four weeks after receiving the draft report. The action plan should be signed off by the head of your institution. This should address any specific conditions set by the review team, as well as respond to any other recommendations and set out any plans to capitalise on any good practice identified.
Once your institution has completed the necessary actions and submitted relevant evidence to QAA, a follow-up desk-based analysis will be undertaken to determine whether your institution has now satisfied the conditions set and consequently meets the IQR standards. A report recommending whether to revise or retain the original outcome will then be submitted to the Accreditation Panel for a final decision. The Accreditation Panel has two options: your institution meets all the standards for International Quality Review, or your institution does not meet the standards for International Quality Review. Once the panel has made its decision, the process as indicated (above and below) is followed.

**Your institution does not meet the standards for International Quality Review**

Where the Accreditation Panel confirms a review team's conclusions that your institution does not fully meet the IQR standards, the outcome of the IQR is unsuccessful. In this instance, the draft report will be sent to your institution to consider whether it wishes to appeal the overall judgement. If your institution chooses not to appeal, then the report will be published on the QAA website.

Any appeal should be made within four weeks of receiving the draft report and should be based on the findings contained within it. QAA will not publish the report, meet a third-party request for disclosure of its contents, or consider the action plan during the appeal process. Where an appeal is unsuccessful, the report will be published promptly after the end of the appeal process. Further details of how to appeal against the review outcomes can be found in Appendix 15.
Stage 5: The mid-cycle review

The mid-cycle review takes place two to three years after a successful review, as a requirement for the continued validity of your QAA International Institutional Accreditation. It provides an opportunity for your institution to receive feedback on how it is following up on recommendations and features of good practice found during the QAA International Quality Review. A successful mid-cycle review is required to retain the QAA Institutional Accreditation Badge for the full five years granted by the QAA Accreditation Panel.

The mid-cycle review is usually a desk-based study, unless the scoping and review visits were conducted virtually. The key stages in the mid-cycle review are shown and explained in more detail below.

The mid-cycle review process

<table>
<thead>
<tr>
<th>Before mid-cycle review</th>
<th>During mid-cycle review</th>
<th>After mid-cycle review</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Review team appointed</td>
<td>• Desk-based analysis</td>
<td>• Draft report to Accreditation Panel</td>
</tr>
<tr>
<td>• Virtual preparatory meeting</td>
<td>• Meetings with range of staff, students, employers and alumni as relevant, and observation of facilities and learning resources if a review visit is required</td>
<td>• Accreditation Panel decision</td>
</tr>
<tr>
<td>• Supporting documentation</td>
<td></td>
<td>• Draft report to institution</td>
</tr>
<tr>
<td>• Liaison between QAA Officer and your institution to confirm the review visit agenda and who the QAA team will meet if a review visit is required</td>
<td></td>
<td>• Factual amendments</td>
</tr>
</tbody>
</table>

The process takes place over approximately four months. An indicative timeline for the mid-cycle review stage can be found in Appendix 3.

Before the mid-cycle review

The mid-cycle review team

QAA appoints a team of two, including one QAA Officer and one reviewer to carry out the mid-cycle review.

The QAA Officer will coordinate the review and act as the primary point of contact with your institution. Your institution will be told who the QAA Officer is and will be welcome to get in touch to ask questions.

The QAA Officer will advise and guide the reviewer in their deliberations to ensure that decisions and the overall conclusion are securely based on the evidence made available by your institution. The QAA Officer is responsible for editing and producing the report, as well as acting as a reviewer. Further details about the role of the QAA Officer can be found in Appendix 4.
QAA will agree names of the proposed QAA review team for confirmation by your institution in advance of the review. Your institution will be informed which institutions or organisations the members of the review teamwork for and whether they have declared any other interests (such as membership of a governing body of another institution). QAA will ask you to indicate any actual or potential conflicts of interest that reviewers might have with your institution and may adjust team membership in light of that information.

**The facilitator**

Your institution must nominate a facilitator to work with the QAA Officer. The facilitator helps to organise and ensure the smooth running of the mid-cycle review stage and improve the flow of information between the QAA team and your institution. The development of an effective working relationship between QAA and your institution through the facilitator should help to avoid misunderstandings (for example, your institution misunderstanding what QAA requires, or QAA misunderstanding the nature and scope of your institution's provision). Further details about the role of the facilitator can be found in Appendix 4.

**Supporting documentation**

As part of the preparation for the mid-cycle review, your institution will be asked to submit a brief evidence-based report to QAA summarising:

- any major changes in the structure and organisation of the institution since the IQR review
- any key strategic developments (for example, in learning and teaching, research or information management) since the IQR review
- where relevant, any developments in collaborative arrangements with partner institutions or other organisations since the IQR review
- actions taken to address the recommendations identified in the IQR review
- actions taken to further any features of good practice identified in the IQR review
- the institution's intentions for the further development of quality assurance procedures and for the enhancement of learning opportunities.

This brief evidence-based report is likely to be the first piece of evidence the review team will encounter in the mid-cycle review process. It will continue to be used throughout the process, both as a source of information and as a way of navigating the supporting documentation.

The report must be accompanied by supporting documentation as evidence. Your institution may also be asked for additional information following the QAA team's desk-based analysis of your submission. Further details about technical requirements for the institution submission and supporting documentation can be found in Appendix 5.

QAA may also compile information about your institution from publicly-available sources. This will vary depending on your institution and may include the most recent reports relating to your institution from other national and international agencies and organisations, and other organisations with which your institution works in partnerships, and information that is freely available on your institution's website.

**Virtual preparatory meeting**

The QAA Officer will contact you approximately three months in advance to agree the schedule for your mid-cycle review. Prior to your submission, the QAA Officer will arrange a virtual preparatory meeting with your institution. The QAA Officer will deliver a briefing on the mid-cycle review process which is followed by the opportunity for you to ask questions. If a review visit is required, the QAA Officer will discuss the agenda for the review visit and will
advise your institution who it would like to meet and when the meetings should take place. The QAA Officer will explain and agree logistics, such as arrangements for the uploading of documentary evidence, at this stage.

**During the mid-cycle review**

A QAA Officer and a reviewer conduct the mid-cycle review to evaluate:

- your institution's response to recommendations and any features of good practices identified in the IQR review
- whether quality assurance and enhancement arrangements appear appropriate in light of evolving institutional priorities and contexts
- whether any changes in your institution might impact on the extent to which the standards are being met.

Where a visit is required in the mid-cycle review, the QAA team will hold meetings with a range of your staff, students and other stakeholders according to a schedule agreed with the facilitator in advance. The facilitator will be responsible for arranging the necessary meetings, ensuring they start on time, and that the agreed participants attend. The review team will adhere strictly to the schedule, starting and finishing meetings on time. The schedule will also allow time for the review team to have private team meetings and meals where they can discuss and explore the review themes; the times of these private meetings must also be strictly observed. A protocol for review meetings is provided in Appendix 8. You should make sure that everyone attending a meeting with the review team are made aware of the protocol.

**After the mid-cycle review**

Following the desk-based analysis and review visit (if required), the review team will finalise its key findings from the mid-cycle review and produce a review report setting out QAA's conclusions about the progress made against the recommendations in the IQR report and highlighting perceived strengths and weaknesses in current and future plans for quality assurance and enhancement. The report will also propose a conclusion regarding the continuing validity of the QAA International Institutional Accreditation.

Once the team has drafted its report, it will be reviewed by an independent panel of QAA Officers who were not involved in the review of your institution. The purpose of this QAA internal moderation process is to check whether the review has been conducted in line with the published method and whether the review findings are clearly articulated, evidence-based and consistent.

The draft report will then be presented to the QAA Accreditation Panel. The Panel will consider the report and reach a decision as to whether or not your institution can continue to use the QAA Institutional Accreditation Badge until the end of the five-year accreditation cycle. The Accreditation Panel meets every three months and meetings are scheduled at least 12 months in advance. All completed IQR reports are presented to the next scheduled Accreditation Panel meeting following completion of the QAA internal moderation process.

Approximately two weeks after the Accreditation Panel meeting, your institution will receive the draft report. Your institution has the opportunity to respond within two weeks of receipt of the draft report, telling QAA of any factual errors or any misinterpretations leading from those inaccuracies. The review team will then consider your response and make any changes it deems necessary, incorporating those changes in a revised report.
Approximately eight weeks after the Accreditation Panel meeting, the finalised report will be sent to you together with an outcome letter confirming whether your institution is making **satisfactory progress** since the successful International Quality Review and that the period of validity of the QAA International Institutional Accreditation can be continued to the end of the five-year accreditation cycle.

The final report will be published on the QAA website.

If the mid-cycle review report indicates the existence of potentially serious difficulties in your institution's management of quality and standards, QAA may decide that further engagement is necessary, or that your institution's licence to display the QAA International Institutional Accreditation logo should be suspended or withdrawn, or that the accreditation should end.
End of accreditation period

Towards the end of the accreditation period, you will be invited to apply for a new IQR review. Details of the process to be followed will be provided during the final year of the institutional accreditation period.

Where you choose to seek a further five-year accreditation, the process for the renewal of IQR commences at Stage 3: Review.
Appendices

Appendix 1 - Supporting documentation required at application stage

Your institution will be asked to supply the following information to support your application:

- a brief description of the institution, its mission and ethos
- a list of programmes (courses) provided
- the locations where learning takes place
- academic partnerships (if any)
- student and staff numbers (headcount) specifically for higher education programmes, as a percentage of all academic provision at the institution
- proof of legal identity and assurance that there are no current legal disputes taking place that may be relevant to the application
- proof of licence to practise (the right to operate as a higher education institution); proof of recognition by the relevant national authority
- proof that you have informed the national quality assurance authority or other relevant agency or ministry to make them aware of your institution’s intention to request an IQR
- proof of ownership/lease of the facilities used for learning
- proof of financial good standing (comprising copies of audited accounts for the previous two years and financial planning for the next two years)
- a short narrative explaining the rationale for the decision to undergo IQR
### Appendix 2 - Supporting documentation required at scoping stage

Your institution will be asked to supply the following information to demonstrate how it meets the scoping criteria:

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Evidence required</th>
</tr>

## Stage 3: Review and accreditation timeline

<table>
<thead>
<tr>
<th>Time</th>
<th>Activity</th>
</tr>
</thead>
</table>
| Week -18 | Your institution confirms decision to proceed to review stage and makes payment  
QAA allocates a QAA Officer and informs your institution                                    |
| Week -16 | Preparatory meeting between QAA Officer and your institution  
Review schedule confirmed                                                              |
| Week -14 | Review team agreed with your institution                                                                                                  |
| Week -12 | Your institution uploads a self-evaluation document (SED) with supporting documentation to QAA online portal                              |
| Week -12 | Review team begins desk-based analysis                                                                                                   |
| Week -9  | QAA Officer requests any additional documentation                                                                                          |
| Week -6  | Your institution uploads additional documentation                                                                                           |
| Week -5  | Review team continues desk-based analysis                                                                                                 |
| Week -4  | Review team holds its first team meeting to discuss the outcome of the desk-based study, and the programme for the review visit  
The QAA Officer informs you of:  
• the review team's main lines of enquiry  
• who the review team wishes to meet  
• any further requests for documentary evidence                                            |
| Week -2  | Your institution uploads additional documentation and confirms attendee lists for the visit  
QAA prepares for the review visit                                                          |
| **Week 0** | **Review visit takes place**                                                                                                             |
| Week +2  | QAA review team prepares draft report  
Draft report goes to QAA internal moderation                                                  |
| Week +4  | Draft report goes to QAA Accreditation Panel                                                                                               |
| **Week 0** | **QAA review team presents recommendation to QAA Accreditation Panel. Accreditation decision is taken**  
(Accreditation Panel normally meets once per quarter with at least four meeting dates set in advance. All completed IQR reports are presented to the next scheduled Accreditation Panel meeting following completion of the QAA internal moderation process.) |

Appendix 4 - Roles and responsibilities

Attributes of scoping/review team members

The principal attributes expected of scoping/review team members include:

- experience of managing quality and academic standards in higher education or recent experience of being a student in higher education
- a clear understanding of the governance and management of higher education institutions
- an ability to assimilate, analyse and synthesise a substantial amount of documentary material
- an ability to engage in discussion and debate with institutional representatives to identify and comment on key issues relating to quality
- an ability to produce written commentary on the findings of review activity and to assist in drafting the report
- a willingness to work as a member of a review team and share responsibility for collective decisions and an overall conclusion.

Responsibilities of the QAA Officer

The principal responsibilities of the QAA Officer at the scoping stage are to:

- ensure compliance with the process set out in this handbook
- liaise with the institution about the schedule for the scoping stage
- keep a record of all meetings relating to the scoping stage
- oversee the follow-up to the scoping visit
- edit and produce the scoping stage report.

The principal responsibilities of the QAA Officer at the review and mid-cycle review stages are to:

- ensure compliance with the process set out in this handbook
- liaise with the facilitator about the schedule for the review programme
- confirm arrangements for the first review team meeting and review visit(s)
- keep a record of all meetings relating to the review
- oversee the follow-up to the review and accreditation stages
- present the review report and the review team findings to the Accreditation Panel
- edit the review report and oversee its production.

The QAA Officer is also a reviewer at the scoping and mid-cycle review stages.

Role and responsibilities of the facilitator

The person appointed as facilitator must be willing to become familiar with the International Quality Review process and should have:

- a good working knowledge of the institution’s systems and procedures, and an appreciation of matters relating to quality and standards
- the ability to communicate clearly in English, build relationships and maintain confidentiality
- the ability to observe objectively
- the ability to provide objective guidance and advice.
The facilitator will be expected to:

- act as the primary contact for the QAA Officer during the preparation for the submission
- act as the primary contact for the QAA team during the visit
- provide advice and guidance to the QAA team on the submission and any supporting documentation
- provide advice and guidance to the QAA team on the institution’s structures, policies, priorities and procedures
- ensure the QAA team is provided with additional evidence, clarifying evidence requests as needed
- help ensure that the institution has a good understanding of the matters raised by the QAA team, thus contributing to the effectiveness of the scoping/review
- meet the QAA team on request during the visit, in order to provide further guidance on sources of information and clarification of matters relating to the institution's structures, policies, priorities and procedures
- where relevant, work with the lead student representative to ensure that the student representative body is informed of and understands the process.

The facilitator will not be present for the QAA team’s private meetings. However, the facilitator will have the opportunity for regular meetings with it at other times, which will provide opportunities for both the QAA team and your institution to seek further clarification outside of the formal meetings. This is intended to aid communication between your institution and the QAA team and enable your institution to gain a better understanding of the QAA team’s lines of enquiry.

The facilitator is permitted to observe any of the QAA team’s other meetings, except those with students and private QAA team meetings. When observing, the facilitator should not participate in the discussion unless invited to do so by the QAA team.

The facilitator may legitimately:

- bring additional relevant information to the attention of the QAA team
- seek to correct factual inaccuracy
- assist your institution in understanding matters raised by the QAA team.

It is for the QAA team to decide how best to use the information provided by the facilitator.

The facilitator is not a member of the QAA team and will not make judgements about the provision. The facilitator does not have access to QAA's electronic communication system for QAA teams.

The facilitator is required to observe the same conventions of confidentiality as members of the QAA team. In particular, the confidentiality of written material produced by QAA team members must be respected, and no information gained may be used in a manner that allows individuals to be identified. However, providing that appropriate confidentiality is observed, the facilitator may make notes on discussions with the QAA team and report back to other staff, in order to ensure that your institution has a good understanding of the matters being raised. This can contribute to the effectiveness of the review, and to the subsequent enhancement of quality and standards.

The QAA team has the right to ask the facilitator to disengage from the review process at any time, if it considers that there are conflicts of interest, or that the facilitator's presence will inhibit discussions.
Responsibilities of the lead student representative

The lead student representative (LSR), if there is one, should receive copies of all key correspondence from QAA.

The LSR should normally be responsible for:

- organising or overseeing any written student submission
- helping the review team to select students to meet
- advising the review team during the review visit, on request
- liaising internally with the facilitator to ensure smooth communication between the student body and your institution
- disseminating information about the review to the student body
- collating the students’ comments on the draft review report
- coordinating the students’ input into your institution's action plan.

The LSR is permitted to observe any of the review team’s meetings with students but not the meetings with staff. The LSR will, however, be invited to attend the final meeting with your institution towards the end of the review visit.

QAA expects your institution to provide appropriate operational and logistical support to the LSR and, in particular, to share relevant information or data to ensure that any student submission is well-informed and evidence-based.
Appendix 5 - Technical requirements for the institution/student submission and supporting evidence

The institution/student submission and supporting documentation must be uploaded to QAA’s secure electronic site. The precise date for doing these will be confirmed in writing. We will explain by letter how the submission and supporting evidence should be uploaded.

The table below shows the key technical points to consider when compiling and uploading the institution/student submission and supporting evidence to QAA’s secure electronic site.

<table>
<thead>
<tr>
<th>Length of submission</th>
<th>To ensure the submission is clear and legible for the review team, the following guidelines on formatting must be adhered to:</th>
</tr>
</thead>
</table>
|                       | • Arial font, 11-point (minimum)  
|                       | • single-line spacing (minimum)  
|                       | • 2 cm margins (minimum). |

<table>
<thead>
<tr>
<th>Overall presentation</th>
<th>The SED and supporting evidence should be supplied in a coherent structure:</th>
</tr>
</thead>
</table>
|                      | • all files together, with no subfolders or zipped files  
|                      | • documents clearly labelled numerically, beginning 001, 002, 003 and so on  
|                      | • ensure that each document has a unique reference number - do not number the same document with different numbers and submit it multiple times. |

<table>
<thead>
<tr>
<th>File-naming convention</th>
<th>Only use alphanumeric characters (a-z and 0-9); for spaces use the underscore (_) and the hyphen (-). Do not use full stops and any other punctuation marks or symbols, as these will not upload successfully.</th>
</tr>
</thead>
</table>

| File types to avoid | Do not upload:  
|---------------------|------------------------------------------------------------------------------------------------------------------|
|                     | • shortcut files (also known as .lnk and .url files)  
|                     | • temporary files beginning with a tilde (~)  
|                     | • administrative files such as thumbs.db and .DS_Store. |

For technical assistance with uploading files, please contact your QAA Officer or the QAA service desk on +44 2829 331111, or email onedesk@m5servicedesk.ac.uk. The service desk operates from Monday to Friday between 9.00 and 17.00 UK time.
## Appendix 6 - Sample schedule for the scoping and review visits

### Stage 2: Scoping visit

A typical schedule for a two day scoping visit might look like this. The actual schedule will be determined by the scoping team in agreement with your institution.

<table>
<thead>
<tr>
<th>Time</th>
<th>Day 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>09.00-10.30</td>
<td><strong>Meeting 1</strong> with Head of Institution and Senior Management Team, including senior staff responsible for quality assurance and enhancement - to include a presentation by your institution of no more than 15 minutes.</td>
</tr>
<tr>
<td>10.30-11.00</td>
<td>QAA team private meeting</td>
</tr>
<tr>
<td>11.00-12.00</td>
<td><strong>Meeting 2</strong> with a representative group of students and alumni</td>
</tr>
<tr>
<td>12.00-13.30</td>
<td>QAA team private meeting and working lunch</td>
</tr>
<tr>
<td>13.30-14.30</td>
<td><strong>Meeting 3</strong> with a group of staff responsible for the delivery of teaching and academic support</td>
</tr>
<tr>
<td>14.30-15.00</td>
<td>QAA team private meeting</td>
</tr>
<tr>
<td>15.00-16.00</td>
<td><strong>Meeting 4</strong> with a group of staff responsible for delivery of support services (for example, library, IT, counselling, language development support, career services)</td>
</tr>
<tr>
<td>16.00-16.30</td>
<td>QAA team private meeting</td>
</tr>
<tr>
<td>16.30-17.00</td>
<td>Meeting with facilitator</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Time</th>
<th>Day 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>09.00-10.00</td>

</tbody>
</table>
Appendix 7 - Guiding principles for determining the need for an onsite visit

Where Covid and other travel restrictions exist, QAA will work with institutions on the assumption that reviews are conducted online but with the proviso that QAA can make a decision that some or all elements of the review may require the team to visit the site. Any onsite presence will be required to ensure the process is robust and fairly assessed.

The QAA guiding principles are:

- The institution comes from a country that does not have clear regulations or well-established QA systems.

- A lack of technological capability on the part of the institution to provide evidence through electronic or online means - this could be written records, online access for observations of teaching and learning, and online observation of specialist facilities and resources.

- The nature of the provision would be more appropriately explored through onsite meetings.

- Concerns raised during the desk-based analysis that might lead to a negative outcome which in the view of the review team would be more appropriately explored through onsite meetings.

- Concerns raised during the desk-based analysis that require the team to be able to control the sampling and investigation of evidence (wider sample base) as well as meeting with students where serious concerns have been raised.

- The need to take account of the foreign travel advice from the UK government.

- The need to take account of and support the health and mental wellbeing of QAA staff and reviewers, as well as staff and students for the institution under review.

- The requirement of the commissioning/regulatory body to conduct the whole or parts of the review/assessment onsite in order to satisfy their needs.

Review teams need to also consider whether conducting the visit onsite will be detrimental to the inclusion of members of staff and students who would not be able to come to the review site. This may be, for instance, where the institution has a number of sites that are geographically dispersed.

The review team can decide that only specific activities need to be conducted onsite and that the other elements could be done online. This is what we would term as a hybrid visit. Hybrid visits are considered lower risk as there is scope to restrict the number of reviewers going onsite and the time spent onsite, thereby reducing risks of contracting Covid and disrupting the review.

Whatever the arrangements for the visit, the team need to be mindful of the fact that the institution is given sufficient opportunity to provide evidence and represent itself in the review.
Considerations for hybrid visits

A hybrid visit is one where some elements of the review/assessment are undertaken onsite while other elements are undertaken virtually. If this is the case, the review team and QAA Officer need to consider:

- how the scheduling of the onsite and online elements will support the overall review
- whether the full team or certain members of the review team need to visit the site
- the need of the QAA Officer to be onsite with the reviewer(s)
- travel arrangements - for instance, whether members of the team should travel separately and by car
- use of Covid-secure hotels (provided by QAA’s travel agency)
- Covid working protocols produced by QAA, the institution and hotel as well as nation-specific Working Safely Guidance.

Hybrid meetings

Hybrid meetings are meetings where a group of in-person attendees connect virtually with other meeting attendees. This may be achieved through either party interacting using video conferencing software as individuals or as a group.

In QAA’s experience, hybrid meetings have limitations and should be avoided where possible unless the institution/meeting participants have the specific technology to support these meetings. If these types of meetings are used, it is recommended that a test run is conducted and timely access to IT support can be made during the meeting at the institution/QAA.
Appendix 8 - Meeting protocol for scoping/review visits

This appendix sets out QAA's protocol for QAA team meetings with representatives of your institution undergoing IQR at various stages. Time is always limited, and it is important that the review team makes best use of the available time in its meetings with staff and students of the institution.

QAA has many years of experience of running such meetings and the protocol is based on that experience. We respectfully ask institutions undergoing IQR to abide by this protocol.

- A schedule of meetings is agreed in advance of the visit. Any suggested changes that are proposed during the visit should be discussed between the QAA Officer and the facilitator at the earliest opportunity.

- The people attending a meeting are agreed in advance with your institution. Any changes to personnel or students attending should be notified to the QAA Officer at the earliest opportunity.

- Numbers attending meetings are limited. Experience tells us that smaller meetings are more effective than larger meetings. Meetings with staff are normally expected to include no more than 10 people plus the review team. Student meetings normally involve no more than 12 students plus the review team. This allows for more in-depth discussion and for all to take part.

- Your institution is asked to ensure participants are invited to the meetings.

- Meetings are generally question and answer sessions. A presentation (about your institution) is only required in the first meeting with the senior staff and in the meeting to discuss facilities. The presentations should be brief (for example, 15 minutes). The QAA Officer may give an overview presentation at the opening meeting, or this may have been sent out prior to the meeting for participants to view. Any presentation should be agreed in advance with the QAA Officer.

- All meetings are led by QAA.

- Meetings will start on time and will not be extended beyond the end time published in the schedule. A meeting may finish earlier than the published end time.

- Those attending a meeting should arrange to be available, uninterrupted, for the duration of the meeting and not leave the meeting except through illness, fire alarm or another emergency.

- Staff at the institution should be briefed not to interrupt a meeting when it is in progress.

- Staff and students should be encouraged to speak freely during meetings. The record of the meeting does not identify individuals, and neither will they be identified in the published report.

- Meetings with students must not be attended by staff. If a student is also a member of staff, they should not attend meetings the team holds with students.

- Meetings will not be recorded.
Appendix 9 - Examples of practice to meet the ESG standards

Listed below are examples of practice that may be witnessed by the review team that may help them to determine the extent to which your institution meets the IQR standards (the 10 ESG standards). They are adapted from the guidelines set out in the ESG for each standard, expanded to reflect examples of practice operating effectively that a QAA accreditation team may expect to see when deciding if an institution meets a standard. The examples should be considered as a guide only, in acknowledgment that not all of them will be appropriate for all institutions. Each institution will have its own examples on which it can draw to provide evidence to the review team. The examples below are not an exhaustive list.

<table>
<thead>
<tr>
<th>Standard</th>
<th>Examples of good practice</th>
</tr>
</thead>
</table>
| 1 | **Policy for quality assurance**  
Clearly set out policies and arrangements for managing quality assurance standards, including where activities are carried out by other parties, appropriate to the context in which the institution is operating.  
- Effective governance and management arrangements to support the implementation and ongoing monitoring of quality assurance and enhancement policies.  
- A quality assurance culture that is evident at all levels of the institution. |
| 2 | **Design and approval of programmes**  
Clearly defined processes, roles and responsibilities for programme design and approval in line with institutional strategy together with appropriate oversight of processes.  
- Criteria against which programme proposals are assessed with relevant use of reference points and external expertise in programme design and approval.  
- Appropriate involvement of students in programme design and approval.  
- Evaluation of programme design and approval processes and action taken to improve them where necessary.  
- Arrangements to support and develop staff contribution to programme design and approval. |
| 3 | **Student-centred learning, teaching and assessment**  
Strategic approach to learning and teaching, understood by staff, students and others involved in teaching and learning with processes to collect and analyse appropriate information to ensure the continued effectiveness of the strategic approach.  
- Learning and teaching activities and associated resources that provide every student with an equal and effective opportunity to achieve the intended learning outcomes.  
- Assistance for students in understanding their responsibility to engage with the learning opportunities provided.  
- Feedback to students that is sufficiently detailed and focused to enable them to monitor their individual progress and further their academic development.  
- Learning and teaching practices that are |

Appendix 10 - Student engagement and involvement

Introduction

Students are central to the review process. In every IQR there are many opportunities for students to inform and contribute to the process. Students are likely to be involved together with your institution in preparations for the review and may produce materials for it. The review team will meet a representative selection of students and will work with the LSR, and students are likely to be involved in responding to the review as your institution develops and seeks to implement the resulting action plan.

Students are also a vital part of QAA's processes. All IQR teams at review stage must include a student. Student reviewers are full members of review teams, contributing in the same way as other members.

QAA will help to brief and support the LSR. Institutions must support the participation of their students’ union and/or representatives in the review, providing training, advice and access to information.

Develop student submission

The function of the student submission is to help the review team understand what it is like to be a student at their institution, and how students' views are considered in the institution's decision-making and quality assurance processes. Evidence from students informs the review team's investigations during the review visit.

The student submission should aim to represent the views of the breadth and diversity of students at the institution. It should draw on existing information, such as results from student surveys and recorded outcomes of meetings with staff and students. It should not be necessary to conduct surveys especially for the student submission.

Any student submission is usually a written document but can take alternative forms, such as video, presentations or podcasts. The submission should be concise and should provide an explanation of the sources of evidence that informed its comments and conclusions.

The student submission should not name or discuss the competence of individual members of staff. It should not discuss personal grievances. It should also seek to avoid including comments from individual students who may not be representative of a wider group.

The student submission must include a statement of how it has been compiled and by whom, and the extent to which its contents have been shared with and endorsed by other students. There is no template; however, it may be based around a set of case studies. How case studies are chosen and shared with the wider student body should be clear. Case studies can be about particular local approaches that are valued by students or about wider initiatives that have had a beneficial impact on learning or support. For instance, students may present case studies on particular initiatives in the programme that develop their employability skills. Alternatively, students may want to highlight how changes introduced across the whole institution are helping to develop employability.

Any separate student submission should be posted to the QAA secure electronic site by no later than 12 weeks before the review visit. The QAA Officer will confirm the precise submission date.
Sharing the student contribution with the institution

Given that the student contribution is such an important piece of evidence in the review process, its development will often have involved discussions with staff who may have supported students in its evolution. In the interests of transparency and fairness, there is an expectation that it will be shared with the institution - at the latest when it is uploaded to QAA’s secure electronic site. Ideally, both the institution's self-assessment and any student submission should reflect how institutions and students routinely work together and the content of neither will be a surprise to the other.

Meetings with students as part of IQR

The review team will meet with students and student representatives as part of IQR. Student representatives will normally be part of each of the meetings or briefings in the preparatory part of the process. During the review visit, the review team will meet with a representative range of students and alumni. The LSR normally helps to select students and alumni to meet the team and to brief them on the nature of IQR and their role within it.

Continuity

Each IQR occurs over a period of several months. Both your institution and the students will have been prepared well before the start of the review and will continue to be involved in action planning afterwards. Your institution is expected to ensure that students are fully informed and involved in the process throughout. The student representative body and your institution should develop a means for regularly exchanging information - not only so that students are kept informed but also to encourage them to get involved.

The student representative body is expected to have an input into your institution's action plan following the review.
Appendix 11 - Writing a self-evaluation document at review stage

Main functions of the SED

The self-evaluation document (SED) should be both descriptive and evaluative. It has several main functions:

- to give the review team an overview of your institution, including its background and experience in managing quality and standards*
- to describe and evaluate your institution’s approach to quality assurance
- to explain to the review team how your institution knows that its approach is effective in meeting the IQR standards (and other external reference points, where applicable), and how it could be further improved
- to guide the review team through the evidence base.

*Details should be provided of any relationships with degree-awarding bodies or awarding organisations that validate the awards or degrees offered by your institution under review, and of any external reference points (other than the IQR standards), such as local/national external quality assurance criteria or standards, or national qualifications framework(s) that your institution takes into consideration, either voluntarily or by requirement.

How the SED is used in the review

The SED is used throughout the review process. During the desk-based analysis it is part of the information base that helps to determine the schedule for the review visit. The review team will be looking for indications that your institution:

- systematically monitors and reflects on the effectiveness of its quality assurance processes
- employs monitoring and self-evaluation processes that use management information to enable comparisons against previous performance and against national and international benchmarks, where available and applicable
- employs monitoring and self-evaluation processes that are inclusive of students (and other people and organisations where relevant)
- employs monitoring and self-evaluation processes that lead to the identification of strengths and areas for improvement, and subsequently to improvements in procedures or practices.

The review team will also expect the SED to consider whether your institution’s pedagogical approaches ensure sufficient support for students to enable them to achieve the intended learning outcomes.

The SED continues to be used by the review team during the review visit, both as a source of information and as a way of navigating the supporting evidence.

A suggested structure of SED

This section demonstrates an effective approach to structuring a self-evaluation document (SED).

Section 1: Brief description

The description should cover:

- your institution’s mission and ethos
- recent major changes (or changes since the last QAA review where relevant)
Section 2: Track record in managing quality and standards

Briefly describe your institution's background and experience in managing quality and standards, including reference to the outcomes of previous external review activities and the institution's responses. Where relevant, describe how the recommendations from the last QAA or other external review(s) have been addressed, and how good practice identified has been built on. Refer to any action plans that have been produced as a result of review(s).

Section 3: Quality assurance standards in relation to the IQR Standards (the ESG standards)

Comment separately on how your institution addresses each of the 10 ESG Standards.

Reference the evidence used by your institution to verify that each standard is being met and is effectively managed, as well as any relevant benchmarked datasets. The evidence should include a representative sample of the reports of internal and external examiners/verifiers (where relevant), programme approvals and periodic reviews, as well as your institution's response to those reports (for example, as minutes of committee meetings), where applicable. (See Appendix 9 for examples of practice used to determine how effectively your institution meets the IQR standards.)

Simplistically, you should comment on:

- what you do
- how you do it
- why you do it that way
- how well you do it
- how you know how well you do it.

Writing style

An effective approach to writing the SED is to provide, for each section, an opening statement containing an evaluation, then qualify it with supporting evidence - for example:

'There is a comprehensive staff development policy [reference to policy] and the University offers a wide range of staff development activities which are systematically recorded [references to the evidence of this]. Although higher education activities are planned in accordance with the requirements of staff, the analysis of the impact of higher education developmental activities on academic standards and the quality of learning opportunities is underdeveloped.'

Such a statement would typically be followed by a clear indication of what is being done to address an area identified for development - for example:

'The University’s Director of Quality and the Human Resources Manager are currently reviewing the staff development policy. It will be strengthened by requiring Higher Education Quality Managers to conduct an annual evaluation of the impact of staff development and
training on the standard and quality of higher education provision. This will serve to improve the planning and sharpen the focus of future events. The revised policy [reference to revised policy] will be available from the start of the new academic year, supported by training for Quality Managers and briefings for staff [Minutes, Higher Education Development team meeting, 23 July 2019, paragraph 2].' An example extract from a SED can be found at the end of this annex.

**Drafting**

Circulating the draft SED to higher education staff (and, if appropriate, students and other stakeholders) for comment, widens the perspective and helps to keep colleagues informed and engaged in the process. Ideally, the document should be owned by many, but read as one voice.

**Paragraphs**

It is important to make the SED as easily navigable as possible as it is used by the review team throughout the review. To help in this we ask that institutions number each paragraph sequentially throughout the document. That is to say, do not start new paragraph numbers for each section.

**Referencing**

The SED must include clear references to the evidence to illustrate or substantiate its contents, since it is not the responsibility of the review team to seek this evidence out. Evidence included must be clearly relevant to the evaluation and as specific as possible. **It is quite acceptable - indeed it is to be expected - that the same key pieces of evidence will be referenced in several different parts of the SED.**

There is some information that is likely to be indispensable to the review team in completing the IQR. The following general information would normally be made available, rather than being provided on request later:

- policies, procedures and guidance on quality assurance and enhancement (perhaps in the form of a handbook or code of practice)
- a diagram of the administrative structures, including deliberative and management committees (both centrally and school/faculty-based), which are responsible for the assurance of quality and standards
- minutes of committees centrally responsible for the quality assurance of your institution for the two academic years prior to the review
- annual overview reports (for example, on external examining or annual monitoring) where these have a bearing on the assurance of quality and standards for the two years prior to the review.
- agreements with degree-awarding bodies and other partners, where applicable.

Specific information from committee minutes or particular policies should be provided to evidence particular standards; the reference should not be to the minutes as a whole of a particular committee but to a particular paper or discussion considered by a specific meeting.

QAA encourages your institution to consider achievements and challenges against relevant national or international benchmarks. Where such benchmarks exist, the SED should reflect on your institution's use of these and contextualise their results. This kind of reflection and evidence will back up statements that are made in the SED and will assist the review team in coming to its conclusions.
QAA encourages your institution to demonstrate how it uses the data and management information available to it, both within its quality processes and to monitor the effectiveness of its approach. Such information is likely to include information about the profile of students, entry standards, progression through study programmes, award achievements and subsequent employment outcomes. It may include information from student evaluation or stakeholder views.

In order for the review team to be able to operate efficiently, both in advance and during the review visit, it is important to ensure that all evidence documents are clearly labelled and numbered.

It is equally important to ensure that each evidence document is clearly referenced to the appropriate text in the commentary using the same labelling and numbering system, and providing paragraph numbers and dates of minutes as appropriate.

The key technical requirements to consider when compiling the institution/student submission and supporting evidence is provided in Appendix 5. QAA will explain by email how the SED and supporting evidence should be uploaded to the secure electronic site. The QAA Officer will inform your institution of the date by which this must be done.

An extract from an example SED section

This section contains an extract from an exemplar SED. It is meant to exemplify in greater depth the effective approach to writing described above and to demonstrate how evidence should be referenced and numbered. The example is not intended to indicate the content required. This will vary from institution to institution to reflect the actual approach to quality assurance being taken.

Standard 1.8: Public Information

The University is committed to publishing clear, accurate, transparent, objective and up-to-date information about its activities. This commitment is reflected in the publishing of the University’s vision, mission and values and overall strategies on the university website (801-University Vision Mission Values Webpage).

The University publishes/disseminates information to its wide range of stakeholders through various sources such as its website www.University.ac.ae, social media channels, newspaper/press releases, etc in accordance with its communications policy. (802-Weekly Media Report, 803-Social Media Communication Policy and Procedure).

The Communications Department plays a key role in managing public information for internal and external university stakeholders. The Department reports to the President and CEO’s Office and is responsible for collating relevant information, managing the university website, electronic and print publications, and overseeing the provision of public information on the University’s social media channels.

The Communications Department is responsible for gathering and disseminating a wide range of information to stakeholders, both internal and external to the University. In regard to public information, their responsibilities include the following:

- Ensuring that communications strategies and plans are developed and implemented effectively to support the objectives of the University.
- Ensuring that all external communication is facilitated through authorised and trained individuals through approved channels following the required approvals.
• Coordinating with internal departments to develop and update the University's website and social media content in line with their communication activities.

• Creating copy-written and branded content and artworks for a wide range of activities and initiatives.

• Managing the University's social media accounts, posting news regarding university services, activities and announcements, and developing customer-centric initiatives to engage stakeholders adequately on social media platforms.

• Managing the University's media communication activities (for example, speeches, press releases, media briefings, brochures, news conferences, publications, advertisements, promotions, events, digital marketing) and aligning all communications across the University and the entirety of its functions, to ensure that consistent messages are being conveyed to the public.

Individual departments and divisions are the content owners of their respective information pages on the University website and portal. However, the Communications Department works with the departments on a periodic basis to ensure that the website content is relevant, up-to-date and accurate. They also regulate the content, conduct editorial and aesthetic quality assurance reviews and checks and ensure timely updates to the provided content.

Prospective and existing students have access to the following publications via the website:

• Academic Calendar (804-UNIVERSITY Academic Calendar Webpage)
• Student Handbook (303-UNIVERSITY Student Handbook)
• Volunteering program 2018-2019 (417-Volunteering Manual)
• Student Code of Conduct 2018-2019 (304-Code of Conduct)
• Academic Advising 2019-2020 (416-Academic Advising Handbook)

The website provides campus-specific information including information on quick facts, programs offered, events, location map and contact information for each of the 16 campuses (805-Campus Information Webpage). Information on the wide range of programs offered is posted on the website. (806-Program Information Webpage).

Detailed program and course information is available in the University Catalogue posted on the website, which contains the following: Program details, Course information, PLOs, CLOs, completion requirements, course credits, teaching staff details, career pathways, job opportunities and professional certifications gained. (204-University Catalogue).

A dedicated section on admission requirements is provided on the website for prospective students, including information on:

• Information for applicants (807-Information for Applicants Webpage)
• Entry requirements (402-UNIVERSITY Admissions Web)
• FAQs regarding admissions (808-Admissions FAQs Webpage)

The website also publishes the University Fact Book which provides current and historical information regarding academic programs, enrolments (as per programs, campus, division, etc), graduates (as per programs, campus, credentials awarded, etc), graduate employment rates, and faculty and staff analysis. The Fact Book is published electronically on the website on an annual basis. (722-University Fact Book 2017-2018).

The Student Life section on the website provides information on the range of support services and facilities to help students attain personal growth and academic achievement. Published information is available on services offered that include online library catalogue, academic advising, personal and career counselling, co-curricular and extra-curricular activities, sport, health and wellness, recreational facilities, financial aid and special needs accommodation and many other details. (423-Screenshot University Student Life Web).
The University News section on the website provides readers with news and stories about what is happening on university campuses - for example, open days, student success stories, new program/s partnerships and general achievements. (811-University News Webpage)

The University also maintains a presence on various social media platforms including Facebook, Twitter, Instagram and YouTube. The University has one of the most engaging social media presences among all educational institutes in the country. The proactive social media team ensures coverage of all internal and external events including live streams and professionally produced media. The social media channels are also used to inspire the youth of the country by motivational and inspirational content on a daily basis.

A university media report is published on a weekly basis on the website that outlines all of the University’s social media activities, newspaper reports, promotional campaigns and launches, etc (809-University Media Report Webpage, 0810-Sample University Media report).

The Communications Department works closely with each campus to ensure brand awareness for both internal and external communications. There were some earlier challenges in terms of ensuring brand consistency owing to the autonomous nature of individual marketing departments at each campus. This was addressed by establishing brand ambassadors and communications POCs (Point of contact) at each campus to ensure consistency in communications messaging. The centralization of creative hub and streamlining of communications policies and procedures has enabled the University to qualify among the finalists of the Government Excellence award where the positive role of the Communications Department has been applauded.

To further enhance the quality of external communication processes, the University has recently launched an initiative ‘University 800-1’ which is a one stop shop for both internal and external stakeholders to interact with the University. The initiative involved the establishment of a customer service call centre that provides prompt resolution and follow-up of all internal and external enquiries, facilitated and supported by in-house ambassadors.

As the University continues to evolve and progress, the journey towards strengthening the governance of our communications processes continues. Following the organizational restructuring and the updated Governance and Operating Model, the following policies and procedures are being developed/updated to support the Communications functions:

- Communications and Marketing Strategy and Planning Policy
- External Communications Policy and procedure
- Internal Communications Policy and procedure
- Brand Management Policy and procedures
- Crisis Communications Policy and procedures
- Procedures relating to events, sponsorships, media monitoring, managing website and social media, and managing press conferences and press releases.

The University is committed to ensuring that the information is accessible, useful, accurate and disseminated through transparent mechanisms to both the internal stakeholders and the public continuously.
Appendix 12 - How the findings are determined at review stage

The judgement matrix below shows how findings are determined by the review team.

**Step 1 - Determine if each standard is met**

<table>
<thead>
<tr>
<th>Your institution demonstrates that it meets a standard if either of the following statements is true:</th>
<th>Your institution demonstrates that it does not meet a standard if either of the following statements is true:</th>
</tr>
</thead>
<tbody>
<tr>
<td>There are no recommendations for improvement in relation to this standard. OR</td>
<td>There are recommendations for improvement in relation to this standard, and they relate, either individually or collectively, to:</td>
</tr>
<tr>
<td>Any recommendations for improvement do not relate to issues that, individually or collectively, present any serious risks* to the management of this standard, and they relate only to:</td>
<td>• weakness in the operation of part of your institution’s governance structure (as it relates to quality assurance) or lack of clarity about responsibilities</td>
</tr>
<tr>
<td>• minor omissions or errors</td>
<td>• insufficient emphasis or priority given to quality assurance in your institution’s planning processes</td>
</tr>
<tr>
<td>• a need to amend or update details in documentation, where the amendment will not require or result in major structural, operational or procedural change</td>
<td>• quality assurance procedures that are not applied rigorously enough.</td>
</tr>
<tr>
<td>• the requirement to complete activity that is already underway in a small number of areas that will allow your institution to meet the standard more fully</td>
<td><strong>OR, more seriously</strong></td>
</tr>
<tr>
<td>• the institution’s practices to drive improvement and enhancement.</td>
<td>There are recommendations for improvement in relation to this standard, and they relate, either individually or collectively, to:</td>
</tr>
<tr>
<td>*Some moderate risks may exist, and these must be addressed in your institution’s action plan in order to avoid more serious problems developing over time.</td>
<td>• ineffective operation of parts of your institution’s governance structure (as it relates to quality assurance)</td>
</tr>
<tr>
<td><strong>Note:</strong> When a standard is met in full, there may be findings of good practice in relation to it; however, a standard may also be met without any good practice being identified.</td>
<td>• significant gaps in policy, structures or procedures relating to your institution’s quality assurance</td>
</tr>
</tbody>
</table>
| **Note:** A finding of good practice does not guarantee that a standard is met in full. A finding of good practice may only enable your institution to partially meet the standard.
Step 2 - Determine the overall judgement

<table>
<thead>
<tr>
<th>...meets all the accreditation standards</th>
<th>...meets all the accreditation standards subject to meeting specific conditions</th>
<th>...does not meet the accreditation standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>All 10 standards have been met.</td>
<td>Only one (or at most two) of the standards have not been fully met.</td>
<td>More than two standards have not been met.</td>
</tr>
<tr>
<td></td>
<td>Condition is set and needs priority action by your institution within an identified timescale (a maximum of 12 months) to ensure the standard is fully met.</td>
<td></td>
</tr>
</tbody>
</table>

**Note:** For further details of the overall judgement and follow-up actions, please refer to the Review Stage above.
Appendix 13 - QAA Accreditation Panel

QAA convenes an Accreditation Panel at regular points throughout the year and maintains a calendar of meetings. Where a review panel submits the review outcome and recommendation regarding QAA International Institutional Accreditation, it will be considered at the next scheduled panel meeting.

The Accreditation Panel, which may sit virtually, will consist of:

- Chair - member of QAA Executive team (not the CEO)
- Deputy Chair - member of QAA senior staff
- Five ordinary members:
  - one UK-based member
  - three international members
  - one student member.

Appointments to the panel shall be for a period of three years with the option of reappointment. Appointments for the student member shall be for a period of one year, extendable by the period of one year.

Other attendees may be invited to meetings to support the panel in its decision-making and discharging of its business.

The panel will review all IQR reports submitted since the previous panel meeting. A record of discussions and decisions will be maintained and available for inspection. A database of decisions, dates and panel members will be maintained by the International and Professional Services team.

The decision of the Accreditation Panel will be notified to the head of the applicant institution.
Appendix 14 - Guidance on producing an action plan

Background

Following the IQR, your institution is required to produce an action plan in response to the conclusions of the report. The action plan is intended to support your institution in the continuing development of your higher education provision by describing how your institution intends to take the findings of the IQR forward and, by extension, continue to engage with the ESG. Through its publication, the action plan constitutes a public record of your institution's commitment to take forward the findings of IQR, and so will promote greater confidence among students and other external stakeholders about the quality assurance of higher education at the institution.

This action plan should be produced jointly with student representatives, or representatives should be able to post their own commentary on the action plan. It should be signed off by the head of your institution and be published on the institution's website. A link to the report page on QAA's website should also be provided. Your institution will be expected to update the action plan annually, again in conjunction with student representatives, until actions have been completed, and post the updated plan to the institution's website.

We do not specify a template for the action plan because we recognise that each institution will have its own way of planning after the IQR; however, an example is provided below.

Example action plan

<table>
<thead>
<tr>
<th>Recommendation or good practice</th>
<th>Action to be taken</th>
<th>Date for completion</th>
<th>Action by</th>
<th>Success indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ensure that all higher education student representatives have access to training and ongoing support to ensure they can fulfil their roles effectively</td>
<td>Develop and implement a training programme and induction pack for higher education student representatives</td>
<td>Insert appropriate date</td>
<td>Senior Management Team</td>
<td>All new higher education student representatives receive an induction pack and undertake training prior to the first student-staff liaison meeting</td>
</tr>
</tbody>
</table>

What do we mean by these headings?

Recommendation or good practice
As identified by the review team and contained in the IQR report.

Action to be taken
Your institution should state how it proposes to address each of the recommendations and good practice in this column. Actions should be specific, proportionate, measurable and targeted at the issue or problem identified by the review team.
**Date for completion**
Your institution should specify dates for when the actions proposed in the previous column will be completed within the timescale specified by the review team. The more specific the action, the easier it will be to set a realistic target date.

**Action by**
Your institution should identify the person or committee with responsibility for ensuring that the action has been taken. If a person is responsible, the action plan should state their role rather than their name.

**Success indicators**
Your institution should identify how it will know - and how it will demonstrate - that a recommendation or good practice has been successfully addressed. Again, if there is a specific action and a clear date for completion, it will be easier to identify suitable success indicators.
Appendix 15 - Complaints and appeals

QAA has a process for considering complaints about its own operation and services. It also has a process for considering appeals against accreditation judgements. Details can be found on the QAA website.

Complaints and appeals can be raised in the event that QAA finds that the institution has been unsuccessful in achieving International Quality Review and the institution considers either that:

- there was a procedural irregularity in the IQR such that the legitimacy of the decision or decisions reached are called into question; or
- there is material that was in existence at the time which, had it been made available before the IQR was completed, would have influenced the judgements of the IQR team, and in relation to which there is a good reason for it not having been provided to the review team during the IQR.

In the event of a 'does not meet' judgement, the institution may submit a written representation to QAA, including evidence, within four weeks of receiving the Accreditation Panel outcome. The procedure for submitting an appeal or complaint is available on the QAA website. Appeals can only be made if the overall outcome is 'does not meet the IQR standards.'
Appendix 16 - Privacy and disclosure of information

An effective IQR requires access to a considerable amount of information, some of which may be sensitive or confidential. Institutions and their staff can be assured that confidential information they disclose to QAA during the various stages of IQR will not be publicly released or used in an inappropriate manner. QAA is committed to processing personal information in accordance with the General Data Protection Regulation (GDPR) and UK data protection laws. Our Privacy Notice tells you what to expect when QAA collects personal information.

QAA’s review policies and procedures provide the following assurances:

- Information provided by your institution is used only for the purpose of review.
- Information marked by your institution as 'confidential' is not disclosed to any other party by QAA or by individual reviewers, though it may be used to inform review findings.
- Staff, students or other people who are invited to provide information may elect to do so in confidence, in which case the information is treated in the same way as confidential information provided by your institution.
- Review meetings are confidential - the review team does not reveal what has been said by any individual, nor are individuals identified in the review report. Your institution is encouraged to require the same degree of confidentiality from people whom the review team will meet during the review.
- QAA and its reviewers store confidential information securely.
- Review teams are required to destroy material relating to a review, including the self-evaluation document and any notes or annotations they have made, once the review is complete.
- Review teams make no media or other public comment on reviews in which they participate. Any publicity relating to a review is subject to QAA policies and procedures and will be managed by QAA’s public relations team.
Appendix 17 - Glossary of terms

Accreditation
A status awarded to an institution that demonstrates it has been subject to a successful QAA review of its quality management.

Accreditation Panel
A group of external and internal experts who consider reports made by IQR teams and who make decisions about whether an organisation is awarded accredited status.

Action plan
A plan developed by the institution after the QAA review report has been published that is signed off by the head of the institution. It responds to the recommendations in the report and gives any plans to capitalise on the identified good practice.

Annual monitoring
Checking a process or activity every year to see if it meets expectations for standards and quality. Annual reports normally include information about student achievements and may comment on the evaluation of courses and modules.

Collaborative arrangement
A formal arrangement between a degree-awarding body and another higher education provider. These may be degree-awarding bodies who the institution collaborates with to deliver higher education qualifications on behalf of the degree-awarding bodies. Alternatively, it may be other delivery organisations who deliver part or all of a proportion of the institution's higher education programmes.

Degree-awarding body
Institutions who have authority - for example, from a national agency - to issue their own awards. Institutions applying to IQR may be degree-awarding bodies themselves or may collaborate to deliver higher education qualifications on behalf of degree-awarding bodies.

Desk-based analysis
An analysis by the review team of evidence, submitted by the institution, that enables the review team to identify its initial findings and subsequently supports the review team as it develops its review findings.

Enhancement
See Quality enhancement

European Standards and Guidelines
For details, including the full text on each standard, see www.enqa.eu/index.php/home/esg

Examples of practice
A list of policies and practices that a review team may use when considering the extent to which an institution meets the standards for review. The examples should be considered as a guide only, in acknowledgement that not all of them will be appropriate for all institutions.

Externality
The use of experts from outside a higher education provider, such as external examiners or external advisers, to assist in quality assurance procedures.
Facilitator
The member of staff identified by the institution to act as the principal point of contact for the QAA Officer and will be available during the review visit, to assist with any questions or requests for additional documentation.

Good practice
A feature of good practice is a process or way of working that, in the view of a QAA review team, makes a particularly positive contribution to the institution's higher education provision.

IQR standards/ the standards for International Quality Review
These are the 10 internal quality assurance standards of Part 1 of the European Standards and Guidelines for Quality Assurance in the European Higher Education Area (Brussels, 2015; often referred to as the European Standards and Guidelines or ESG).

Lead student representative (LSR)
An optional voluntary role that is designed to allow students at the institution applying for IQR to play a central part in the organisation of the review.

Mid-cycle review (MCR)
A review by QAA Officers, two to three years after the IQR, of how the institution has responded to IQR recommendations and furthered any features of good practice.

Oversight
Objective scrutiny, monitoring and quality assurance of educational provision.

Peer reviewers
Members of the review team who make the decisions in relation to the review of the institution. Peer reviewers have experience of managing quality and academic standards in higher education or have recent experience of being a student in higher education.

Periodic review
An internal review of one or more programmes of study, undertaken by institutions periodically (typically once every five years), using nationally-agreed reference points, to confirm that the programmes are of an appropriate academic standard and quality. The process typically involves experts from other higher education providers. It covers areas such as the continuing relevance of the programme, the currency of the curriculum and reference materials, the employability of graduates and the overall performance of students. Periodic review is one of the main processes whereby institutions can continue to assure themselves about the academic quality and standards of their awards.

Professional, statutory and regulatory bodies (PSRBs)
Organisations that set the standards for, and regulate the standards of entry into, particular professions. Professional qualifications (as distinct from academic qualifications) are determined by PSRBs, and they may stipulate academic requirements that must be met in order for an academic programme to be recognised as leading to, or providing exemption from part of, a professional qualification.

Where degree-awarding bodies/awarding organisations choose to offer programmes that lead to, or provide exemption from, specific professional qualifications, the requirements of the relevant PSRB will influence the design of academic programmes, but the responsibility for the academic standards remains with the degree-awarding body/awarding organisation that is awarding the academic qualification.

Where institutions have PSRB accreditation for their programmes, review teams will explore how accreditation requirements are taken into account in the setting and maintaining of standards and the quality assurance of programmes. Review teams will also explore how accurately information about accredited status is conveyed to students.
Programme of study
An approved course of study that provides a coherent learning experience and normally leads to a qualification.

Quality enhancement
The process by which higher education providers systematically improve the quality of provision and the ways in which students' learning is supported.

QAA Institutional Accreditation Badge
A graphic provided by QAA under licence to institutions that have successfully completed an IQR and have been accredited by QAA's Accreditation Committee.

Quality assurance
The systematic monitoring and evaluation of learning and teaching, and the processes that support them, to make sure that the standards of academic awards meet the necessary standards, and that the quality of the student learning experience is being safeguarded and improved.

QAA Officer
A member of QAA staff who is responsible for managing all stages of the review, including liaison with the facilitator and the lead student representative (if appropriate).

Recognition of prior learning
Assessing previous learning that has occurred in any of a range of contexts including school, college and university, and/or through life and work experiences.

Recommendation
Review teams make recommendations where they agree that an institution should consider developing or changing a process or a procedure in order to improve the institutions higher education provision.

Reference points
Statements and other publications that establish criteria against which performance can be measured.

Self-evaluation document
A self-evaluation report by an institution. The submission should include information about the institution as well as an assessment of the effectiveness of its quality systems.

Student submission
A document representing student views that describes what it is like to be a student at the institution, and how students' views are considered in the institution's decision-making and quality assurance processes.

Validation
The process by which an institution ensures that its academic programmes meet expected academic standards and that students will be provided with appropriate learning opportunities. It may also be applied to circumstances where a degree-awarding institution gives approval for its awards to be offered by a partner institution or organisation.
